

# AIBEK SAALIEV

## FRONTEND DEVELOPER

### PERSONAL PROFILE

With the thrilling force of Harry Potter in "The Chamber of Secrets," I, as a junior developer, immerse myself in the realm of gaining experience, exploring various "spells" in the field of development. Like Harry before facing Voldemort, I am acquiring knowledge, honing my skills, and soon I will be as adept as during the events of "The Deathly Hallows."

---

### AREAS OF EXPERTISE

- Javascript, Typescript, HTML and CSS
- React, Redux, Next.js, Node.js, Express.js, NestJS, SASS/SCSS, MUI, Bootstrap
- NoSQL (MongoDB), SQL (PostgreSQL)
- CodeceptJS

### WORK EXPERIENCE

#### ONLINE SCHOOL

##### Team project

- We developed an application for selling online courses, enabling users to purchase courses and access them in their personal accounts. The app facilitated assignment submission and review by instructors, enhancing the learning experience. Our collaborative team delivered a user-friendly platform with secure payments and personalized profiles, creating a positive online learning environment.

#### CITY-SCOPE

##### Pet project

- I have worked on a personal project that shares similar functionality to 2GIS, where I focused on working with maps. The project allows users to explore city maps, search for establishments, and access information such as addresses, reviews, and locations on the map. Registered users have the ability to create new establishments, leave reviews, provide ratings, and more. This project has provided me with hands-on experience in map integration and user-driven content management within a location-based platform.
